Installing TurningPoint on a Mac

Instructions for installing TurningPoint and setting the program to launch on initial launch. You can find installation files at: P:\sogpublic_new\ITD\Computer Related\Turning Point.

1. After install is completed, launch TurningPoint which will open the TurningPoint Dashboard.

2. Select “Install PowerPoint Library” from the “PowerPoint Polling” panel.
4. If you would like to make Global changes for all of your TurningPoint polls, you may do so by selecting the “PowerPoint” option. You can make specific changes and customizations on an individual presentation by editing the preferences and settings within that presentation.

![Preferences window for TurningPoint](image)

5. When you have finished making your changes select “Close”.
