Making Unpublished Site Visible to Students

When a new course site is created in Sakai, it will be unpublished which means that members can not access the site content. This allows you to add your materials and assignments in preparation for the start of your project or course.

1. Login at http://sakai.unc.edu and go into your course site

2. Select Site Editor from the left side

3. Select Manage Access from the menu bar

4. Check the box for “Publish site” and select “Ok”.
